Professional Summary

Undergraduate Software Engineering student with practical experience designing and developing full-stack web applications using MERN Stack, Angular, Next.js, Nest-JS, .NET, PHP, MySQL, SQL Server, Firebase, and AI integrations. Experienced in building responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications through personal and academic projects. Passionate about software engineering, cloud technologies, and scalable application development while continuously expanding expertise in Spring Boot and Microservices.

Technical Skills:

-
- **Programming Languages:** JavaScript, TypeScript, Java, C#, PHP, SQL
 - **Frontend Technologies:**
 - React.js
 - Next.js
 - Angular
 - HTML5
 - CSS3
 - Tailwind CSS
 - Bootstrap
 - **Backend Technologies:**
 - Node.JS,
 - Express.js
 - Nest.js
 - ASP.NET
 - Spring Boot (Learning)
 - **Tools & Software:** Git, Visual Studio Code, IntelliJ IDEA, etc...
 - **Databases:** MySQL, SQL Server, MongoDB, Firebase Firestore
 - **Currently Learning**
 - Spring Boot
 - Spring Security
 - Microservices Architecture

Some Highlighted Projects:

1. AI Powered Repair Management System (Lazy-Repairing)

Technologies: Next.js, Firebase, MongoDB, Node.js, Gemini AI API, Tailwind CSS, TypeScript.

- Developed a Full-stack AI Powered repair management system for Users, Technicians and Admin.
- Implemented role-based authentication and authorization.
- Built responsive user interfaces optimized for desktop and mobile devices.
- Integrated Firebase Fire-store and Storage for data and image management.
- github link: <https://github.com/abdhulrashidh2002-cmd/Lazy-Fix-repair-management-system>.

2. hospital Management backend System (Backend)

Technologies: Node.js, Express.js, MongoDB

- Designed and implemented RESTful APIs for CRUD operations with proper data modeling and relationship handling using MongoDB.
- Integrated authentication and role-based access control (RBAC) to secure endpoints for admin, doctors, and staff users.
- Developed a hospital management backend system using Node.js, Express.js, and MongoDB to handle patient records, appointments, and staff management.
- github link: <https://github.com/abdhulrashidh2002-cmd/hospital-system-api>.

3. Blazor Web-Assembly Full-Stack System (Client + Admin Apps)

Technologies: Blazor Web Assembly, Firebase (Auth/Database), C#, Bootstrap, HTML.

- Developed a **full-stack web application using Blazor WebAssembly**, consisting of **two connected applications (User and Admin dashboards)** communicating with a shared backend API.
- Integrated **Firebase services** for authentication and backend support.
- Styled responsive UI using **Bootstrap and HTML/CSS** for better user experience.
- User Dashboard: <https://github.com/abdhulrashidh2002-cmd/EventUserDashboard>.
- Admin Dashboard: [abdhulrashidh2002-cmd/EventManagerAdminDashboard](https://github.com/abdhulrashidh2002-cmd/EventManagerAdminDashboard).

Education

BSc (Hons) in Software Engineering

Cardiff Metropolitan University, UK

Delivered through ICBT Campus

- Currently completing Year 2 and Expected Graduation: 2027-November

G.C.E. Advanced Level (A/L)

School Name: Ku/ Paragahadeniya National School

- Stream: Physical Science
- Year Completed 2021(2022)
